PROFILE

DevOps Engineer with 3+ years of hands-on experience working with production environments, containerized applications, Linux servers, CI/CD pipelines, and deployment processes. Experienced with Docker, Docker Compose, Nginx, Linux, GitHub Actions, GitLab CI, and cloud infrastructure. Focused on deployment automation, service configuration, production environment maintenance, and improving application reliability.

Core stack: Linux, Docker, Docker Compose, Nginx, GitHub Actions, GitLab CI, Bash, Git, PostgreSQL, MongoDB, Yandex Cloud.

WORK EXPERIENCE

DevOps Engineer — TechWizards

Jan 2024 — Sep 2026

Remote

- Maintained and configured the production infrastructure of an international logistics platform, including a web application, admin panel, and Telegram services, supporting 5+ Docker containers.
- Containerized services using Docker and Docker Compose, standardizing development and production environments and simplifying service deployment and management.
- Configured Nginx as a reverse proxy for production services, including request routing and application exposure.
- Diagnosed issues across Linux environments, containers, services, and deployment processes.

Stack: Linux, Docker, Docker Compose, Nginx, Git, Bash, Yandex Cloud, MongoDB

DevOps Engineer — Loovatech

May 2023 — Jan 2024

Remote

- Maintained Linux-based production environments for a mobile Cash & Carry platform, ensuring stable operation of backend services and supporting infrastructure.
- Configured and maintained Docker environments for applications, ensuring consistent service configuration across development and production environments.
- Developed and maintained CI/CD pipelines using GitHub Actions and GitLab CI to automate application testing, builds, and deployments.
- Managed application configuration and environment variables, troubleshooting deployment-related issues.

Stack: Linux, Docker, GitHub Actions, GitLab CI, Git, PostgreSQL, MongoDB

TECHNICAL SKILLS

Languages:	Python, SQL, Bash
Operating Systems:	Linux, Windows
Databases:	PostgreSQL, Redis, MongoDB, MySQL, SQLite
Web / Reverse Proxy:	Nginx
Monitoring & Logging:	Docker Logs, Linux Logs
Containerization:	Docker, Docker Compose
CI/CD:	GitHub Actions, GitLab CI
Networking:	TCP/IP, HTTP/HTTPS, DNS, SSH
Cloud:	Yandex Cloud
Tools:	Git, GitHub, GitLab, Docker CLI, Linux CLI

EDUCATION

Pridnestrovian State University

Bachelor's Degree, Software Engineering · 2024 — Present

3rd year · Distance / part-time learning
