PROFILE

Python Backend Developer with 3+ years of hands-on experience building backend systems, REST APIs, asynchronous services, and Telegram applications. Developed services with FastAPI and Django, integrated third-party APIs (Bitrix24) to automate business processes, and configured production infrastructure on Docker and Linux.

Core stack: Python, FastAPI, Django, PostgreSQL, MongoDB, Redis, Docker, Linux, REST API, CI/CD, Git.

WORK EXPERIENCE

Python Backend Developer — TechWizards

Jan 2024 — Sep 2026

Remote

- Developed backend services with FastAPI for an international logistics platform, including a web app, admin panel, and Telegram bot, supporting up to 2,000 active users and 500+ orders per day.
- Integrated Bitrix24 via REST API, automating synchronization between internal microservices and logistics systems, reducing manual operations in request processing by approximately 70%.
- Built an AI microservice to automate operations at pickup points and data processing, handling up to 10,000 requests per day.
- Configured production infrastructure and deployed services with Docker Compose, Nginx, and Linux, ensuring stable operation of 5+ containers.

Stack: Python, FastAPI, Aiogram, asyncio, MongoDB, REST API, Bitrix24 REST API, Docker, Docker Compose, Nginx, Linux

Python Backend Developer — Loovatech

May 2023 — Jan 2024

Remote

- Designed REST APIs for a mobile Cash & Carry platform using Django and Django REST Framework for B2C and B2B clients, supporting up to 1,500 active users and 300+ transactions per day.
- Automated electronic document generation, reducing transaction processing time by approximately 60%.
- Strengthened system security through robust authentication and encrypted inter-service communication.
- Maintained production environments on Linux, Docker configurations, and CI/CD pipelines using GitHub Actions and GitLab CI.

Stack: Python, Django, Django REST Framework, PostgreSQL, MongoDB, REST API, Docker, Linux, GitHub Actions, GitLab CI

TECHNICAL SKILLS

Languages:	Python, SQL, Bash
Backend Frameworks:	FastAPI, Django, Django REST Framework, Flask
Databases:	PostgreSQL, Redis, MongoDB, MySQL, SQLite
ORM & Data Layer:	SQLAlchemy, Alembic, Beanie
Telegram API:	Aiogram, Telethon
Async & APIs:	Asyncio, Aiohttp, REST API, WebSockets
DevOps & Cloud:	Docker, Docker Compose, Nginx, Linux, Yandex Cloud
CI/CD:	GitHub Actions, GitLab CI
Message Queues:	Kafka, RabbitMQ
Testing:	pytest, unittest
Tools:	Git, GitHub, GitLab

EDUCATION

Pridnestrovian State University

Bachelor's Degree, Software Engineering · 2024 — Present

3rd year · Distance / part-time learning
